AI, ML and GenAI on the shopfloor

What each one actually does

Matt Barber · shopfloormatters.com

Swipe →

Machine learning is older than you think

SPC, from the same family of thinking, has spotted drifting processes for decades.

And it’s paying back today

Predictive maintenance pays back now. Predictive quality and vision inspection are opening up more.

GenAI helps people

Shift summaries and plain-English answers, on every screen.

Agentic AI prepares the work

A person approves. Automation grows as trust does.

Build the AI and the data together. Each use case shows you what to capture next.
