72%

of industrial organisations say frontline workforce issues have hurt their performance

The experienced people are retiring

And the knowledge that keeps your lines running lives in their heads, not in a system.

4.9 years

Median tenure in US manufacturing. New starters won't stay long enough to learn the old way.

What most operators still work with

- Paper checklists
- Whiteboard handovers
- Spreadsheet skills matrices
- Apps that don't talk to each other

The job of shopfloor software has changed

Recording what happened isn't enough. It has to guide people through the work.

YOUR TURN

How many screens does your operator touch in one shift?
